

Project Calendar:

Create a calendar in your preferred software that begins January 26th, 2015 and ends May 15th 2015.

Begin by placing all other major events you know of this semester (Concerts? Sports? Travel?). As you receive syllabi for other classes, place due dates of major projects on the calendar.

For each project, place on the calendar an anticipated time for all required critiques. They must be placed on a Monday or Wednesday. Anticipate completing 4 projects.

For your first project, fill in key production days around this schedule

This calendar will change. At the completion of each project, update and repost your calendar based on your current estimations. If it becomes necessary to drop a project, do so and reapportion the time accordingly.
