

Schedule

Schedule out your production from the point of your project approval through the end of production. There should be a meaningful check-in at least every other week. Email this schedule in, and post it to your wordpress site.

Important information:

- Your final completion date must be on or before April 24th, 2015
- You may not schedule any major work to be done over the Thanksgiving, winter or spring breaks.
- You will be evaluated in part on how well you stick to this schedule.

Schedule yourself with enough breathing room to account for things that might go wrong.
